

## VEHICLE SHOULDER-STRAP COVER WITH DISPLAY POCKET

### ABSTRACT OF THE DISCLOSURE

A device for displaying printed material is configured to be releasably attached to a vehicle shoulder belt to facilitate easy retrieval and/or viewing of the printed material. The device includes a flexible base sheet, a flexible pocket secured to the base sheet or a flexible panel secured to the base sheet to define a pocket, and a releasable fastener connect to the flexible base sheet to allow releasable attachment of the device to a vehicle shoulder belt. The releasable fastener is configured to connect opposite edges of the device together so that the device can be wrapped around a vehicle shoulder belt and secured thereto by connection of opposite edges of the device.
